BOSTON---The U. S. Environmental Protection Agency has proposed a \$10,000 penalty against United Technologies Corporation for violations of hazardous waste management laws at its Pratt and Whitney Division in East Hartford, CT.

EPA's complaint alleges that aisle space in the storage area and the condition of storage containers was not adequate for the safe management of hazardous waste.

EPA conducted the inspection on February 4, 1987.

The company was cited under the federal Resource Conservation and Recovery Act.

Pratt and Whitney manufactures aircraft engines and parts. As part of the manufacturing process the company generates acid, alkalines, chromium, cyanide and solvents.
